

Holmesglen at Eildon

Conferences • Functions • Events

Environmental Policy

Situated just 2 hours north east of Melbourne between the picturesque Yarra Ranges and Victoria's High Country, our 660acre property boasts a purpose built award winning venue that caters for conferences, functions, weddings and events.

Our contemporary facility truly reflects its natural surrounds with bush land, native wildlife, Snobs Creek and just 3kms from Lake Eildon. We offer on-site accommodation for 150, flexible function rooms, boardrooms and a wide range of entertaining spaces including pool and tennis court. We deliver catering services for intimate groups of twelve through to larger groups through our commercial kitchen.

We offer a range of activities including bike riding, horse riding, canoeing, archery, Segway, laser clay target shooting, giant foosball, low ropes, raft building, guided walks, fishing. The property also services as a working cattle farm and Agroforestry plantation.

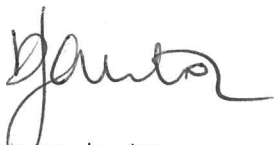

At Holmesglen at Eildon, we recognise the impact of our operations here have the potential for negative impacts on the environment if not properly managed. We are committed to, where possible, improving our sustainable practices and becoming a more environmentally conscious facility. By working as a Team, we aim to contribute to this by our overall efforts and will highlight to our guests ways they can assist too. We will strive towards minimising our environmental footprint by implementing initiatives, and hopefully leaving the Earth better than we found it.

To deliver our commitment we will:

- Commit to giving special consideration to employing locals, and sourcing products, services and produce locally.
- Continue to improve our sustainable practices
- Comply with relevant environmental legislation and take a proactive approach to future requirements and obligations.
- Seek to maintain natural resources through responsible use of energy, water and materials whilst also maintaining our quality of service expected by our guests and clients.
- Monitor our waste performance by reducing, re-using, and recycling in areas where we can. For example, reduction of waste materials and water consumption.
- Work with our local suppliers who are monitoring and managing their impact on the environment.
- Follow Fair Trade principles.
- Through our active Green Team - ensure that our efforts are continually reviewed, monitored, updated and communicated to all staff.

We communicate our policy with all Stakeholders, Employees and the Community.
